Bringing Light, Art and Life to your garden

The Living Garden Light was born out of frustration in not being able to supply our clients with interesting, different yet functional lighting for their gardens.

We have brought the elements of art, lighting and garden together to create a eclectic fusion of unique light boxes.

These garden lights use new age LED lighting with a lifespan of over 50,000 hours and are fully waterproof allowing them to be placed within the garden as well as a patio or al fresco areas.

This initial series 1, has a range of three sizes, small, medium and large, with each one a unique one off design from our Western Australian studio. The lights have a hanging bracket and are light in weight.

Prices range from \$ 360.00 for the small to \$480.00 for the large model plus packing, freight and GST. Wholesale prices available to approved clients.

For models shipped outside of Western Australia the garden media and plants are not included.

Further information email: verticalgardenswa@hotmail.com or call Mob: 040 7373 804.

Is a mini garden

Is an art piece in your garden

Illuminates as a Lamp and a feature
